

## **Circe Invest Nominated for Third Consecutive Year at the Investment Sustainability Awards 2026**

**July, 6 2026**

Circe Invest is proud to announce its nomination at the 2026 Sustainability Investment Awards by Investment Week for the third consecutive year.

This recognition is particularly meaningful at a time when sustainable investing is being tested, reshaped and redefined. The challenge is no longer only to invest sustainably, but to integrate resilience, geopolitics, climate and long-term value creation into better investment decisions.

Founded in 2023, Circe Invest partners with global asset owners and managers to seamlessly integrate performance, risk, and sustainability into a unified investment framework through expert advisory and active implementation. The nomination reflects the firm's conviction that sustainability must move beyond principles and become a practical engine for stronger, more resilient capital allocation.

Circe Invest is also pleased to see GIST Impact included on this year's shortlist. Fiona Frick's role on the Advisory Board of GIST Impact reflects a shared commitment to advancing transparent, actionable and impact-driven approaches to sustainable finance.

Circe Invest thanks the organisers of the Investment Sustainability Awards for this recognition, and extends its gratitude to its clients, partners and peers for their trust, collaboration and continued inspiration.
